

DIGITAL PORTFOLIO · DEVELOPMENT PROPOSAL

Trisha *Vanam*

Portfolio — Development Summary & Investment Overview

A comprehensive overview of the premium digital craftsmanship, bespoke technical architecture, and editorial aesthetics delivered for the Trisha Vanam fashion design portfolio.

Enterprise-Grade *Hosting*

Built on the same infrastructure stack trusted by the world's leading digital publications and fashion houses.

01 Hosting & Media Architecture

Vercel Edge Network

Global edge deployment with zero-downtime releases, automatic SSL, enterprise-grade CDN caching, and serverless high-availability. Lightning-fast globally regardless of visitor location.

Cloudinary Global CDN

Automated AI-powered media logistics. All high-resolution imagery served dynamically in next-gen formats (WebP/AVIF) via intelligent transformation parameters — zero visual quality loss.

02 Core Technology Stack

Next.js & React 19

Robust, SEO-optimised framework enabling lightning-fast static and dynamic rendering across all devices.

Three.js & React Three Fiber

Advanced WebGL 3D rendering engine powering the interactive desktop portfolio galaxy scene with true Z-axis depth.

Framer Motion & GSAP

Cinema-quality, hardware-accelerated animations and scroll-triggered reveals throughout the entire experience.

Lenis & Tailwind CSS

Fluid 60-FPS smooth scrolling architecture paired with pixel-perfect responsive utility-first styling.

Global Design Effects

- **Magnetic Custom Cursor** — Bespoke cursor that dynamically responds to all interactive elements with fluid magnetic attraction.
- **Film Grain & Ambient Lighting** — Custom CSS overlays delivering an editorial "analog film" texture sitewide.
- **Responsive Typography** — Fluid font scaling across Google Fonts (Inter, Playfair Display, Caveat) from ultra-wide desktop to mobile.

Page-by-Page Breakdown

Home Page

4.1

An immersive, ultra-premium gateway engineered to immediately capture and hold attention.

- **Marquee Typography**, 200vh sticky scrolling timeline, curated fragments showcase, curved SVG masking transitions.
- Dynamic WebGL "Spooky Smoke" canvas background, Mix-Blend-Mode headers, and 3D hover-scale card interactions.

Immersive Work / Portfolio

4.2

A responsive architectural marvel — entirely different experiences per device type.

- **Desktop:** Full WebGL 3D scatter arrangement with true Z-axis depth — a parallax galaxy of images.
- **Mobile:** Optimised "Editorial Button" interface — prioritising touch UX and mobile performance.

Design Diary / Collections

4.3

Digital index for the designer's core philosophies and narrative stories.

- 5 narrative categories in an asymmetrical 2-2-1 editorial grid. Sequential stagger animations and interactive GlowCard spotlight hover effects.

Editorial Fragment Pages

4.4

Romantiques · In Bloom · Regalia — crafted to mirror high-end fashion magazine spreads.

- Segmented editorial layouts: Hero Images, Mood Boards, Silhouette Boards, Range Boards, and pure CSS interactive Pantone Swatch Chips.
- GSAP ScrollReveal: animations reverse on desktop scroll-up, trigger-once on mobile to prevent scroll jank.

About Page

4.5

An intimate narrative of the designer's background and creative ethos.

- "Meet the designer" editorial layout with custom portrait and dynamic "View Projects" footer navigation.
- Multi-stop gradient transitioning from stark white to dark mahogany; advanced SVG-masked smoke vignette bleeding into the footer.

Contact Page

4.6

A streamlined, high-conversion inquiry interface for direct studio correspondence.

- Advanced "peer-focus" CSS floating labels — placeholder text elegantly rises above the input line when engaged.
- Instantaneous slide-up confirmation interaction on submission — no page reload required.

Transparent Pricing

Crafted to reflect the precision and care put into every pixel.

ONE-TIME · PROJECT DELIVERY

Full Portfolio Development

Complete design, build, and deployment of your bespoke editorial portfolio — end to end.

₹ **45,000**

One-time investment · Full handover

- ✓ Custom 3D WebGL portfolio experience
- ✓ Full responsive mobile architecture
- ✓ Vercel deployment + Cloudinary CDN setup
- ✓ 6 fully crafted editorial pages
- ✓ All animations, effects & interactions
- ✓ Custom domain & SSL configuration

MONTHLY · ONGOING SUPPORT

Website Maintenance

Continuous monitoring, content updates, performance checks, and priority bug resolution.

₹ **3,000** / month

Flexible · Cancel anytime

- ✓ Content & image updates
- ✓ Performance monitoring
- ✓ Security & dependency patches
- ✓ Priority bug fixes
- ✓ Monthly health report

NOTE

Complexity-Based Pricing

Variable

All prices may vary based on the scope, design complexity, and custom interactions required.

Note on Pricing: All quoted prices are starting points. Final investment is determined after a detailed brief, accounting for design complexity, number of animations, third-party integrations, and custom feature requirements. A formal quote will be provided before any work commences.

Let's build something remarkable.

This portfolio is a living digital studio — designed to evolve
alongside your creative identity. We're here for every chapter.
